PROJECTS

FotoFolio

https://foto-folio.vercel.app/ | github

A Photo gallery app for searching, saving, and downloading images, providing a seamless visual experience

● Built a Node.js/Express API interfacing with Pixabay for seamless image search and download

● Implemented an in-memory cache for reduced API calls and latency, refreshing data daily.

● Utilized the Intersection Observer API to enable infinite scrolling, improving user experience

Puck-Master

https://puck-master.vercel.app/ | github

An interactive virtual table hockey game playable on both mobile and desktop, where you face off against a computer

● Integrated AI into the game, using collision detection and boundary algorithms for strategic gameplay

● Developed a physics engine for accurate puck and player movements, incorporating friction, velocity, and force for realism

Quick-Sum

https://quicksum-production.up.railway.app/ | github

A summarization application that quickly condenses articles and blog posts by simply pasting the URL

● Developed a content extraction system using Puppeteer and Cheerio for retrieving articles from URLs

● Utilized OpenAI API to summarize extracted text, applying a chunking method for improved efficiency

● Created a user-customizable summarization feature to enhance user experience

EXPERIENCE

Financial Copywriter

Financial Copywriter | NOV 2021 - DEC 2023 | REMOTE

● Authored compelling, engaging, and informative content about various stocks, ensuring due diligence and in-depth analysis

● Communicated complex financial information in clear, digestible terms across multiple platforms including Twitter and InvestorsHub
